**NEW!**  
 Just Picture It Photography has changed the way we shoot this season. We are extracting the players and teams this season and putting them on an Ai created collage back grounds. We do not require shooting the team on the ice. We use a key lite background and can do it right in the lobby, thus trying not using up your ice time. We can schedule the shoot about 30-40 minutes before your ice time or in a gym. If it can't be organized, we can just do it in the first 20-25 minutes of practice as we usually do. All players are shot individually and stitched into a team picture and their individuals.
