**NEW!**

**Just Picture It Photography** has changed the way we shoot this season. We are extracting the players and teams this season and putting them on an AI created collage back grounds. We do not require shooting the team on the ice. We use a key life background and can do it right in the lobby, thus trying not using up your ice time. We can schedule the shoot about 30-40 minutes before your ice time or in a gym. If it can't be organized, we can just do it in the first 20-25 minutes of practice as we usually do. All players are shot individually and stitched into a team picture and their individuals.

## Ask About Team Creator

With practice space at a premium and costs rising every year, we realize we have to change the way we photograph sports and be more time and space efficient. Just Picture It Photography has been working hard to provide you with the latest options for team and individual photos. We can shoot your pictures on or off the playing surface, and save time by doing several teams at the same sitting, at the rink or a gym. We shoot players on a Hikey Illuminated Background. We can now extract your individual player photos, composite them, and place the team back on a background template or design. Below is a diagram of how the process works.

Players Team Individual

Team/Player Composite Collage

Finished Team Collage
